

Fleet of the Space Research Service

What is it and why?

Vladimir Proschenko, Kaliningrad, 2017

Early 60`s:
The first tracking ships of USSR

1967:
Tracking ships purposed
for the Soviet Lunar program

1970-1971:
Universal, tracking and control ships

1977-1978:
Tracking ships
of the "Selena-M" project

The Neptune festival

India. Alang beach.
RV "Kosmonavt Yuri Gagarin",
RV "Akademik Sergey Korolev" and
RV "Kosmonavt Georgy Dobrovolsky"

This time: RV "Kosmonavt Viktor Patsayev" -
the only living tracking ship of the Space Research Service

2001-2017:
The Museum of the World Ocean places its exhibitions
on the board of "Kosmonavt Viktor Patsayev"

2003-2017:
"Kosmonavt Viktor Patsayev"
on space research service

Our slogan: “Patsayev” must be alive!

Veteran`s expectations:

1. To save “Patsayev” from destruction
2. To create on its board:
 - the Museum of the Space research fleet
 - children and youth training and education centre
 - conditions for scientific meetings and conferences

End of message.
Thank you for your attention
